To get started finding conshef xiv tech manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

conshelf xiv tech manual

Warnings, Cautions and Notes pay special attention to information provided in Warnings, Cautions and Notes that are accompanied by one of these symbols. A WARNING indicates a procedure or situation that, if not avoided, could result in serious injury or death to the user. A CAUTION indicates any situation or technique that could cause damage to the product, and could subsequently result in injury to the user. A NOTE is used to emphasize important points, tips, and reminders. Use of SCUBA equipment by uncertified or untrained persons is dangerous and can result in serious injury or death. WARNING This regulator is not configured for commercial use with surface supplied air. WARNING Always pressurize the regulator gradually by opening the cylinder valve SLOWLY. WARNING Never lubricate any part of the regulator particularly the oring providing the seal between the cylinder valve and the regulator with any lubricants. WARNING do Not apply any type of aerosol spray on the regulator. WARNING Factory prescribed service for this regulator must be performed at least once annually by a factory trained Aqua Lung Service Technician. Repair, service, disassembly or first stage adjustment must not be attempted by persons who are not factory trained and authorized by Aqua Lung America Inc. WARNING DO NOT use the regulator first stage as a carry handle when lifting or transporting the cylinder as this can damage the regulator or the cylinder valve. WARNING When diving in cold water below 50F or 10C, you must have received training and certification in the techniques of cold water diving from a recognized training agency. WARNING the Conshelf XIV is designated compatible for use only with normal, atmospheric, compressed air 21% oxygen and 79% nitrogen by volume. Failure to observe this warning may result in serious injury or death due to fire and explosion, the serious deterioration and failure of the equipment. CONSHELF XIV USERS MANUAL 5

- **conshelf xiv tech manual, conshef xiv service manual, 1.0.**

INTRODUCTION Congratulations and thank you for choosing Aqua Lung. Your new regulator meets all existing standards for quality and performance and has been designed and manufactured with the greatest care. Perhaps, more than any other item of equipment that you have bought, the better care you take of your regulator, the better it will perform for you. Before diving with your new Aqua Lung regulator it is important that you read this manual in its entirety so that you can familiarize yourself with its features and the rules for using the regulator before, during and after the dive so as to retain optimum performance for the years to come. 2.1 product description The Conshelf XIV consists of the basic Conshelf first stage and Conshelf second stage assembly. Capable of pressures up to 4350 psi with the DIN version. Adjustable Intermediate Pressure. Convertible to Supreme or Dry Environment versions. Available in Yoke DIN Conversion Kit available. First Stage The Conshelf XIV second stage is formed from Marine Brass and chrome plated for durability. Multiple mouthpieces are available for a comfortable fit. Installed external lever height adjustment port for easy 2nd stage adjustment. When air is heard exiting, immediately close the valve. This will clear any moisture or debris that may be inside the cylinder valve outlet opening. 4. Check the condition of the cylinder valve oring. 5. Place the first stage regulator over the cylinder valve so that the inlet fitting aligns with the oring of the cylinder valve and the LP hose of the primary second stage will be routed over the right shoulder. While holding the first stage in place, turn the yoke screw clockwise. Ensure that the yoke screw mates into the small dimple on the backside of the cylinder valve and tighten finger tight only Fig 1. Fig 1 CONSHELF XIV USERS MANUAL 3.1.2 DIN Connector 7 1. Remove the protector cap from the cylinder valve.

2. <http://magyarifjak.org/upload/98-honda-civic-manual-transmission.xml>

With the cylinder valve facing away from you, release a small amount of air from the cylinder by turning the handwheel counterclockwise to open the valve only slightly. When air is heard exiting, immediately close the valve. This will clear any moisture or debris that may be inside the threaded cylinder valve opening. 3. Check the condition of the oring located in the end of the DIN connector. 4. Position the first stage regulator near the cylinder valve so the LP hose of the primary second stage will be routed over the right shoulder. Thread the first stage DIN connector into the cylinder valve, turning the handwheel clockwise by hand until it is lightly snug. DO NOT use tools to tighten Fig 2. NOTE The Conshelf XIV does not come standard with a DIN Connector. A DIN Adapter Kit, PN 107455, is available and can be installed by a Trained Technician. Fig 2 8 CONSHELF XIV USERS MANUAL 3.2 prediver Checks 1. Carefully inspect all hoses at their fittings to ensure they are securely connected onto their respective ports on the first stage. Inspect the length of each hose to ensure that the hoses are not blistered, cut or otherwise damaged. It may not display this or other websites correctly. Cousteau SEA 1st Stage Service Manual Page %CURPAGENUM% of %LASTPAGENUM% But that is the only difference. They all use the same parts kit as the Titan. You really don't need a manual for the old Aquarius. It is very simple and only has one moving part. The New Aquarius 1994 to 1997 is the same as the New Calypso that AL is still selling. That said, you can find a copy of the US Divers Aqua Lung Repair manual at Vintage Double Hose in the download section www.vintagedoublehose.com .

The manual from VDH has the old Aquarius in it, as well as the Conshelf IV and XI, which are identical inside to AL balanced regs right up to the Titan. Thanks Paladin, I will check those out today. Didn't know the 2nd stages in all those were the same. Feel kind of stupid for not checking that first, but thank you for bringing it to my attention. Since 2000, ScubaBoard has been the place to go for internet based discussions related to all things Scuba. There are US Divers manuals from 1971, 1976 and modern. I have the same question about a Conshelf SE. It has not been tested and hasn't been used in awhile. Instruction manual available online. Factory prescribed service for this

Find Aqua Lung Titan LX Regulator. With 100s of Results. Search Now! I got it from eBay and its in EC condition but.one never knows whats going on internally until its torn down. Anyone have a service manual on this reg, parts breakdown they can send me, etc Thanks. The phone number is 18003255711. I have done a lot of business with them I have four Conshelf 14s and they know their stuff and are very helpful. John Ill have to call them. What about service manuals, etc The Conshelf 14 is still listed on Aqualung website as a current item, although I think they push it more for Military and commercial use. Someone once told me it was originally designed for Navy, but I dont know if that is right or not.Interestingly enough the first one I bought off of ebay came with the parts for a rebuild in the box with it. MarVel will sell the parts and rebuild kit.

I registered with them through the State Police and other than some problems with their new software, ordering via their web page has worked well. I dont know if the Conshelf 14 was developed specifically with the Navy in mind, but it was their standard regullator and was also used extensively by the commercial market.It covers the Supreme cold water version as well. John Thanks for the info yea, I see where the Conshelf is THAT expensive wow whats it got inside of it gold All parts in original boxes with paperwork. Conshelf 14 reg, Conshelf 14 Octo, Oceanic guages. Bought LP inflator hose from LDs. Still havent spent what Marvel sell base reg for. Isnt life wonderful The part number is 780202. John. It was the successor to Continental Shelf Station One Conshelf One. The projects were named Precontinent I, Precontinent II and Precontinent III. Each following project was aimed at increasing the depth at which people continuously lived under water.The undersea colony was supported with air, water, food, power, and all other essentials of life, from a large support team above. Men on the bottom performed a number of experiments intended to determine the practicality of working on the sea floor and were subjected to continual medical examinations.Such colonies did not find a productive future, however, as Cousteau, after forming Conshelf Three a few years later, withdrew his support for such exploitation of the sea and put his efforts toward conservation.When the experiment ended, two structures were dismantled and removed.Retrieved 1 June 2016. Some of Regulator Inspection vs. Overhaul Whats the Difference XS Scuba is the most complete fullline supplier of scuba diving products from masks, snorkels, fins, buoyancy compensators and regulators. XS Scuba has completed intensive industry testing on its nearly 500 diverse products so that you can rest assured that your equipment is ready to go when you are. If an inspection or overhaul is missed, the regulator no longer qualifies for the Free Parts for Life Sherwood Scuba Scuba Regulators for sale eBay norm defines the minimum technical standards of acceptance for recreational diving regulators. All SCUBAPRO regulators have successfully passed the certification test required by this regulation. Regulator Servicing The Scuba Doctor The demand for regulator service technicians by dive facilities and resorts is high, but individuals with specialized training in both the theoretical and practical aspects of servicing scuba life support systems and related equipment is low. For many years, I have believed that professional regulator service could be better served by teaching the fundamental functions of the regulator, rather than relying solely upon a procedural approach.

This book translates this idea into physical reality. Regulator Savvy is divided into two complimentary sections that are uniquely. Cressi Cressi Professional Scuba Diving Equipment 2. This manual gives breakdowns of regulator parts, equipment specifications, servicing instructions, troubleshooting recommendations, and guidelines for proper care of these regulators.
